

Elevating Government Efficiency Through Improved Identity Management in 2025 and Beyond

Governments face serious challenges as they work to improve security, efficiency, and accessibility. Escalating security threats, intense cost pressures and geopolitical complexity make change necessary. At the heart of all of this change and challenge is identity management. The ability to identify authorized users and provide secure, reliable access to resources and services is essential.

NextgenID leads the evolution and is bringing solutions to market that optimize identity for government agencies of all sizes. We're delivering American-made, ADA-compliant, and IAL-3-certified solutions that perfectly align with modern requirements.

The Gold Standard for Identity

What is IAL-3 Certification?

The highest level of identity verification and confidence when conducting digital transactions, according to the National Institute of Standards and Technology (NIST).

Why IAL-3 Certification Matters

IAL-3 guarantees that every person, system or machine that is part of a transaction is who they claim to be.

Supervised Remote Identity Proofing (SRIP)

The only IAL-3-certified solution, SRIP makes high-assurance identity proofing attainable remotely via certified agents. Recognized as the only IAL-3-certified solution by the Kantara Initiative, it ensures compliance with critical federal standards, including NIST SP 800-63 and FIPS 201-3.

High-Assurance Identity Proofing Solutions

IAL-3-Certified Solution

ADA-Compliant

Cost-Effective & Scalable

American-Made

“ IAL-3 is essential for government operations, especially as the volume and sophistication of cyberattacks increases. ”

NextgenID Solutions Drive Innovation

As the Identity, Credential, and Access Management (ICAM) marketplace evolves, agencies face increasing pressure to deploy modern solutions. Citizens expect experiences that are fast, error-free, and intuitive. Budget realities demand solutions that are scalable, adaptable, and compatible with emerging technologies. And evolving regulations require technologies to offer strong data security and ADA compliance. NextgenID engineers account for all of this in every solution we bring to market.

Key Outcomes for Federal Agencies

Boost Efficiency

Developed in collaboration with Federal and key private sector partners, the PresenceID network from NextgenID delivers a broad network of self-service kiosks — eliminating the time and travel inefficiencies of traditional in-person identity proofing.

Streamline Processes

Two keys to successful identity programs are rapid onboarding and unflinching accuracy. NextgenID solutions feature AI-driven workflows and biometric authentication to ensure this happens, while also providing government agencies with scalability to cut costs and manage service levels.

Buy American

Government agencies are pushing for American-made technologies for many reasons, including security and economic growth. NextgenID's AI workflows, multi-modal biometrics, and robust hardware are designed and manufactured in the U.S.

Engineered for Federal Standards

Certified Compliance

Adherence to NIST, FIPS, and FedRAMP standards.

Flexible Deployment

Support for both remote and in-person identity proofing.

Continuous Innovation

Anticipate future challenges and adapt to address them.

Future-Proof, High-Assurance Identity Solutions Accessible & User-Friendly Experiences

Accessible Services:

Nationwide network of Identity Stations.

Reduced Wait Times:

Employees can access high-assurance identity proofing services faster.

User-Friendly Design:

Simplifies the process for individuals with disabilities.

Trust and Reliability:

Enhances citizen confidence in government systems.

Secure Credentialing & Identity-Proofing Workflows

Kiosks, Desktop and Mobile Identity Stations: Ensure strong digital security and full compliance with all deployment models.

FBI-Certified Biometric Devices:

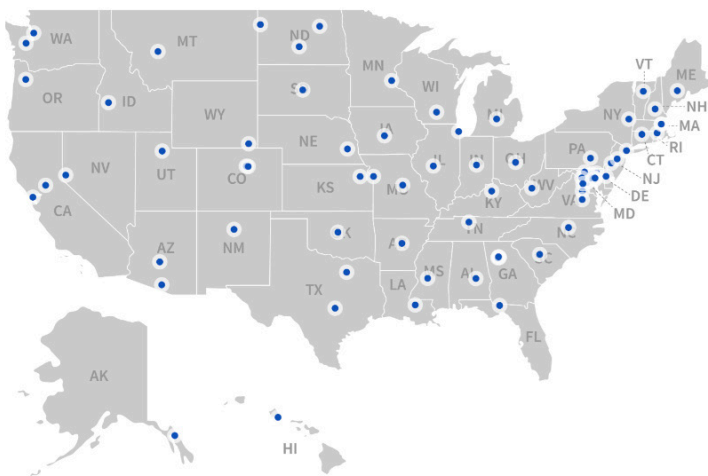

Capture fingerprints, facial recognition, and iris scans with precision.

Remote Supervision:

Allow agents to oversee multiple sessions, which reduces costs and increases availability.

Nationwide Reach:

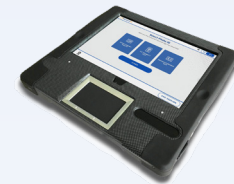

Expand accessibility through the expanding PresenceID network, ensuring convenient service access for citizens.

Proven Results and Real-World Impact

NextgenID helped Federal and Commercial sector customers transform onboarding and credentialing processes for new and existing employees. Instead of traveling to a central location or waiting extended periods of time for secure access, employees can now visit a PresenceID location and quickly manage the onboarding process and issue or reset secure credentials via the PresenceID service.

80% Reduction in Wait Times

Employees can now access identity-proofing services faster, minimizing delays in onboarding and credential resets.

65% Savings in Operational Costs

Organizations eliminated inefficiencies and reduced the administrative burden of in-person appointments.

Enhanced Employee Satisfaction

Workers were presented with a fast, intuitive process, widely accessible stations, and fast issuance of secure credentials.

Adaptable Use Cases Tailored to Meet Your Needs

- Mass Hiring
- Disaster Response
- Employee Onboarding
- Access Management (PIV, CAC, FRAC, TWIC)

“ NextgenID services modernize identity proofing for government agencies by improving security, reducing costs, and elevating service levels. **”**

About NextgenID

NextgenID is revolutionizing the way that government employees, contractors, businesses and citizens are provisioned with high assurance credentials. We’re building solutions that help establish highly trusted digital identities that increase security and privacy, reduce costs, promote inclusivity and enhance efficiency. Our patented technologies empower organizations to protect against security threats while meeting even the most stringent compliance standards—all with a fast, seamless process built for modern convenience. presenceid.com • nextgenid.com
