

In-Person and Onsite Attended Enrollment with Identity Station - Desktop

Patented Identity Solution for the National Institute of Standards and Technology (NIST) and American National Standards Institute (ANSI) and ISO/IEC Compliant Identity Enrollment & Proofing.

Compact, Powerful, and Uncompromised Identity Proofing

The NextgenID Identity Station - Desktop is designed to occupy minimal physical space while delivering essential biometrics, biographic, and document collection capabilities. Its compact size allows you to perform identity proofing for Medium and High Identity Assurance Levels, all while meeting the strict regulatory standards set by the FBI, government agencies, and commercial organizations.

This secure, streamlined solution is ideal for expanding your identity-proofing network when space is at a premium. As a compact alternative to the Identity Station - Kiosk, it supports in-person and onsite attended enrollment, providing flexible, compliant, and high-assurance identity verification without sacrificing valuable physical space needed for core operations.

Self-Service and Onsite Attended Enrollment (Supervised Identity Proofing) in a compact footprint!

MARKETS

- Commercial
- Government
- Transportation
- Healthcare
- Hospitality
- Banking
- Criminal Justice

USE CASES

- Identity Proofing
- Credential Management
- Visitor Management
- Law Enforcement

Capabilities

Collect Biometrics

Collect fingerprints (slap and roll), iris and photos.

Validate Photo IDs

Verify the authenticity of government-issued IDs such as passports, driver's licenses, mobile driver's licenses (mDLs), green cards (Resident Card), visas, and other commonly used photo IDs.

Manage Credentials

Facilitate activation, PIN services, credential unlocking, certificate, and profile management for a variety of smart cards and tokens.

Remotely Monitor Sessions

Multiview cameras ensure the integrity of the transaction and safety of the applicant. Fully compliant with NIST SP 800-63A and FIPS 201-3 Onsite attended enrollment, known as Supervised Remote Identity Proofing (SRIP).

Collect Payment

Optionally collect credit card and mobile payments and dispense receipts.

Scan Paper Documents

Scan forms and other documents to capture electronic images with optional OCR.

Connect Securely

The identity station supports ethernet, Wi-Fi, cellular, and satellite communication options.

Benefits

Compact

- Quickly deploy additional units as your operation expands.
- Rapidly react when you experience transaction volume spikes.
- Utilize minimal office space to enroll or onboard your personnel.
- Expand service offerings without impacting core business.

Configurable

- Designed to be mounted on standard desktops.
- Add-on options for payment collection.
- Preferred 3rd-party optional configuration biometric devices.
- Customize the unit with your corporate identity, brand colors, and logos.
- Secure, monitored & integrated technologies.

User-friendly & Low Maintenance

- All-in-one unit to enable transport with no additional equipment.
- Connect to a live agent at the touch of a button.
- Set up takes less than 15 minutes.
- ADA-compliant if mounted on an ADA-compliant desktop.

About NextgenID, Inc.

NextgenID, Inc. is a trusted leader in high-assurance (IAL-3) identity-proofing solutions, serving both government and commercial sectors with a secure, compliant, and innovative approach. Our solutions include the Trusted Identity Platform software, PresenceID™ Identity Stations, and Trusted Agent Services—each crafted to deliver efficient, accurate, and secure identity proofing.

Our patented Onsite Attended Enrollment, known as Supervised Remote Identity Proofing (SRIP), supports both in-person and remotely supervised identity proofing and verification, offering flexible, high-assurance options that address a wide range of verification needs. SRIP fully aligns with NIST SP800-63-3 and FIPS 201-3 standards, ensuring robust security and regulatory compliance. We are the first and only certified IAL-3 solution by the Kantara Initiative and are actively pursuing FedRAMP high certification, reflecting our commitment to meeting federal standards and stringent security requirements for government and commercial applications alike.

NextgenID is proud to be listed on the FBI Certified Products List and holds a GSA Multiple Award Schedule contract (Contract Number: 47QTC A25D008K), making it easier for federal agencies to procure our trusted solutions. At NextgenID, the collection and validation of biographic, biometric, and administrative identity attributes is optimized for efficiency and cost-effectiveness, setting a new standard in today's rigorous identity-proofing landscape.
