

## In-Person and Onsite Attended Enrollment with Identity Station - Kiosk

*Patented Identity Solution for the National Institute of Standards and Technology (NIST) and American National Standards Institute (ANSI) and ISO/IEC Compliant Identity Enrollment & Proofing.*

### Scale and Expand Your Use of Identity

NextgenID's Identity Station - Kiosk is a comprehensive solution for secure, convenient, and cost-effective identity proofing, designed to meet the rigorous standards of the FBI, government agencies, and commercial organizations. Supporting both in-person identity enrollment and Onsite Attended Enrollment, also known as Supervised Remote Identity Proofing (SRIP), the kiosk offers versatile and reliable identity verification. Fully compliant with all NIST Identity Assurance Levels (IAL1 -3), this station enables secure biometrics, document verification, and identity credentialing, enhancing data integrity and ensuring a seamless user experience. Powered by NextgenID's Trusted Identity Software, the identity Station provides a streamlined, high-assurance enrollment process for high-security environments.

With its compact, space-efficient design, the NextgenID Identity Station - Kiosk delivers essential biometrics, biographic, and document collection capabilities, making it ideal for locations where space is limited. Supporting both in-person and SRIP enrollment for Medium and High Assurance Levels, this versatile station offers a high-assurance identity verification solution while optimizing physical space for other core operations.

**Remove the challenges of in-person identity-proofing  
or enhance your existing in-person proofing methods!**

### Capabilities

#### Collect Biometrics

Collect fingerprints (slap and roll), iris and photos.

#### Validate Photo IDs

Verify the authenticity of government-issued IDs such as passports, driver's licenses, mobile driver's licenses (mDLs), green cards (Resident Card), visas, and other commonly used photo IDs.

#### Manage Credentials

Facilitate activation, PIN services, credential unlocking, certificate, and profile management for a variety of smart cards and tokens.

#### Remotely Monitor Sessions

Multiview cameras ensure the integrity of the transaction and safety of the applicant. Fully compliant with NIST SP 800-63A and FIPS 201-3 Onsite attended enrollment, known as Supervised Remote Identity Proofing (SRIP).

#### Collect Payment

Optionally collect credit card and mobile payments and dispense receipts.

#### Scan Paper Documents

Scan forms and other documents to capture electronic images with optional OCR.

#### Connect Securely

The identity station supports ethernet, Wi-Fi, cellular, and satellite communication options.

## MARKETS

- Government
- Commercial
- Transportation
- Healthcare
- Hospitality
- Banking
- Military
- Criminal Justice

## USE CASES

- Identity Proofing
- Border Patrol
- Credential Management
- Visitor Management
- Social Work
- Law Enforcement
- Passport, ID, and DL Issuance and Renewal

## Benefits

### Configurable & Versatile

- Customize the required biometric, biographic, and administrative information to be collected.
- NextgenID can build the station with your preferred alternate biometric and peripheral devices.
- Personalize the station with your corporate identity, brand colors, and logos.
- Manage credential types such as smart cards, FIDO Tokens, and Digital Credentials.
- Offer adjacent services requiring biometrics, documents, or remote supervised transactions.

### User-friendly

- NextgenID provides user friendly augmented help for workflows.
- Promote services or other marketing purposes when the station is idle.
- Provide remote chat or video assistance via one-touch support.
- Serve enrollees with special needs and/or languages.
- Deploy to both secure and publicly accessible areas.
- Full ADA compliance ensures that you are inclusive to everyone.

### Scalable & Cost-Effective

- Leverage public buildings and under-utilized office space.
- Leverage third parties to offer your services.
- Quickly deploy more identity stations in response to surges.
- Increase throughput without significant labor cost increase.
- Utilize a remote workforce to proctor sessions.
- Share services and lower costs with multi-tenant capabilities.

## About NextgenID, Inc.

NextgenID, Inc. is a trusted leader in high-assurance (IAL-3) identity-proofing solutions, serving both government and commercial sectors with a secure, compliant, and innovative approach. Our solutions include the Trusted Identity Platform software, PresenceID™ Identity Stations, and Trusted Agent Services—each crafted to deliver efficient, accurate, and secure identity proofing.

Our patented Onsite Attended Enrollment, known as Supervised Remote Identity Proofing (SRIP), supports both in-person and remotely supervised identity proofing and verification, offering flexible, high-assurance options that address a wide range of verification needs. SRIP fully aligns with NIST SP800-63-3 and FIPS 201-3 standards, ensuring robust security and regulatory compliance. We are the first and only certified IAL-3 solution by the Kantara Initiative and are actively pursuing FedRAMP high certification, reflecting our commitment to meeting federal standards and stringent security requirements for government and commercial applications alike.

NextgenID is proud to be listed on the FBI Certified Products List and holds a GSA Multiple Award Schedule contract (Contract Number: 47QTCA25D008K), making it easier for federal agencies to procure our trusted solutions. At NextgenID, the collection and validation of biographic, biometric, and administrative identity attributes is optimized for efficiency and cost-effectiveness, setting a new standard in today's rigorous identity-proofing landscape.
